Special Staplers

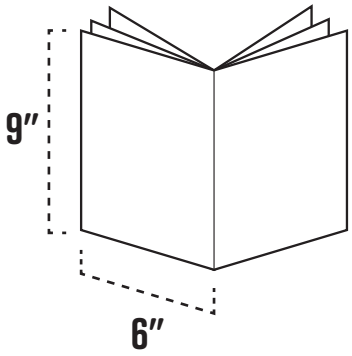

Long Reach Stapler

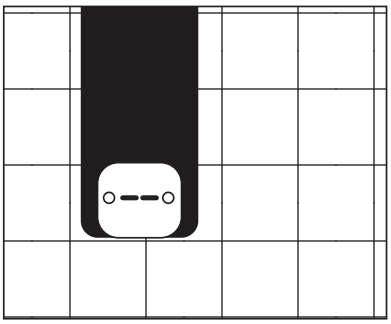

Look at the ruler on the stapler, and move the guide to match the width of one of your pages (edge to spine)

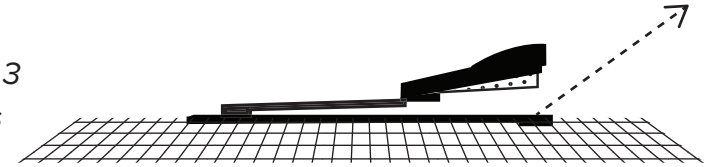

There's a dent on the stapler that shows where the staple will go, and you may also find it helpful to line it up with one of the grid lines on a cutting mat, then match your book's spine fold to the same line.

The COMD studio has 3 long staplers, in rooms C3215 and C3218.

Booklet Stapler

Just line up the fold with the "hill" of the stapler.

Larger page sizes are more difficult, because they need to curl around the curved back part of the stapler.

The COMD studio has 1 booklet stapler, in room C3218.
